RISHI KASHYAP

Berlin, Germany (Willing to relocate) | (+49) 1791673876 | rishikashyap.work@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Product Manager with 3+ years of experience building and scaling consumer mobile apps (200k and 570k daily users) across North America, LATAM and Asia, distributed through B2B2C partnerships with Motorola and Verizon. Experience owning product growth and commercial outcomes like a mini-GM, with revenue up 4x on one app and 70% on another. Skilled at leading engineering and design squads across US and India teams, and partnering with data analysts and monetization leads. Experience in 0-to-1 development and engagement growth, from onboarding to notification and widget flows. Builds working prototypes and agentic workflows in Cursor and Claude Code.

PROFESSIONAL EXPERIENCE

InMobi (CONSUMER TECHNOLOGY, $280M REVENUE, GLOBAL PRESENCE) **Bengaluru, India**
AI-powered mobile and TV platforms. Last two roles were at Glance, a subsidiary of InMobi

Product Manager **Jan. 2025 - Jul. 2025**

- Grew revenue by 70% in 4 months for a content discovery app (200k DAU) distributed with Verizon by moving users from web to native and A/B testing monetization initiatives in Firebase.
- Improved daily user retention for the same app by 12% through onboarding and engagement flow optimizations, contributing to the revenue uplift.
- Owned relationships with 2 OEM partners (Motorola, Verizon), delivering weekly metric reports and product updates, and coordinating technical troubleshooting.
- Ran two GenAI lock screen experiments (image and voice, 1k+ daily users) from prototype to launch, testing whether atomic, preference-driven use cases would grow daily engaged users.
- Drove AI adoption across 2 product teams by sharing prompting frameworks and prototyping workflows.

Associate Product Manager **Jan. 2024 - Dec. 2024**

- Led product and GTM for a news and games app deployed with Motorola in LATAM, rebuilding a basic V1 in a single release window that grew DAU 2.5x and revenue 4x.
- Grew clicks/user 30% by revamping the homepage feed and engagement flows, and total clicks by 40% on an Android widget through a redesign and rule-based content ranking, contributing to the revenue growth.
- Launched a live 2024 U.S. Elections widget with the Associated Press, lifting engaged users 26% on election days, with nearly 2x the usual content CTR.
- Integrated Microsoft News APIs and managed the vendor relationship end to end (contract, compliance, revenue share).
- Led analytics and privacy compliance (GDPR, CCPA, COPPA) across 12 markets, with zero compliance incidents.

Senior Business Analyst (Product) **Jan. 2022 - Dec. 2023**

- Analysed product metrics and user data for 4 products, generating insights and automating reporting via Python.
- Scaled app-install monetization as a new revenue stream, managing attribution and campaigns via Appsflyer and TUNE.
- Business POC for 2 telco-owned products, coordinating releases, operations and sales pitches with OEM partners.

Business Analyst (Product) **Jun. 2021 - Dec. 2021**

- Onboarded and integrated 70+ HTML5 games from scratch, working with gaming studios and running quality checks.
- Improved editorial CMS workflow efficiency by 20% by developing features co-ordinating with backend teams.
- Supported news partner onboarding via vendor evaluation and deal support, signing 2 partners (30+ U.S. publishers).

EDUCATION

IE BUSINESS SCHOOL **Madrid, Spain**
International MBA, Specialization in Digital Business and Analytics **Sep. 2025 - Dec. 2026**
Big Data & AI Club, Entrepreneurship Club, Venture Lab | Exchange at ESMT Berlin | 3.7/4

PES UNIVERSITY **Bengaluru, India**
Bachelor of Technology: Electronics & Communication Engineering (First Class Honors) **Aug. 2017 - May 2021**
Merit Scholarship | Published research on edge caching | 9.05/10

SKILLS

- **Product & Data:** SQL, Python, Power BI, Databricks, Google Analytics, Firebase, JIRA, Figma, Agile/Scrum
- **Growth & Monetization:** A/B Testing (Firebase), MoEngage, Appsflyer, Google Ad Manager, Ad SDKs
- **AI & Automation:** Claude Code, Claude API, Cursor, Lovable, n8n, ElevenLabs, Whisper
