

DORMIA

SLEEP IS NOW A SPORT.

Tech Roulette Challenge
Team 26 | Fractional Experts

The Problem

Every app is built to keep you awake.

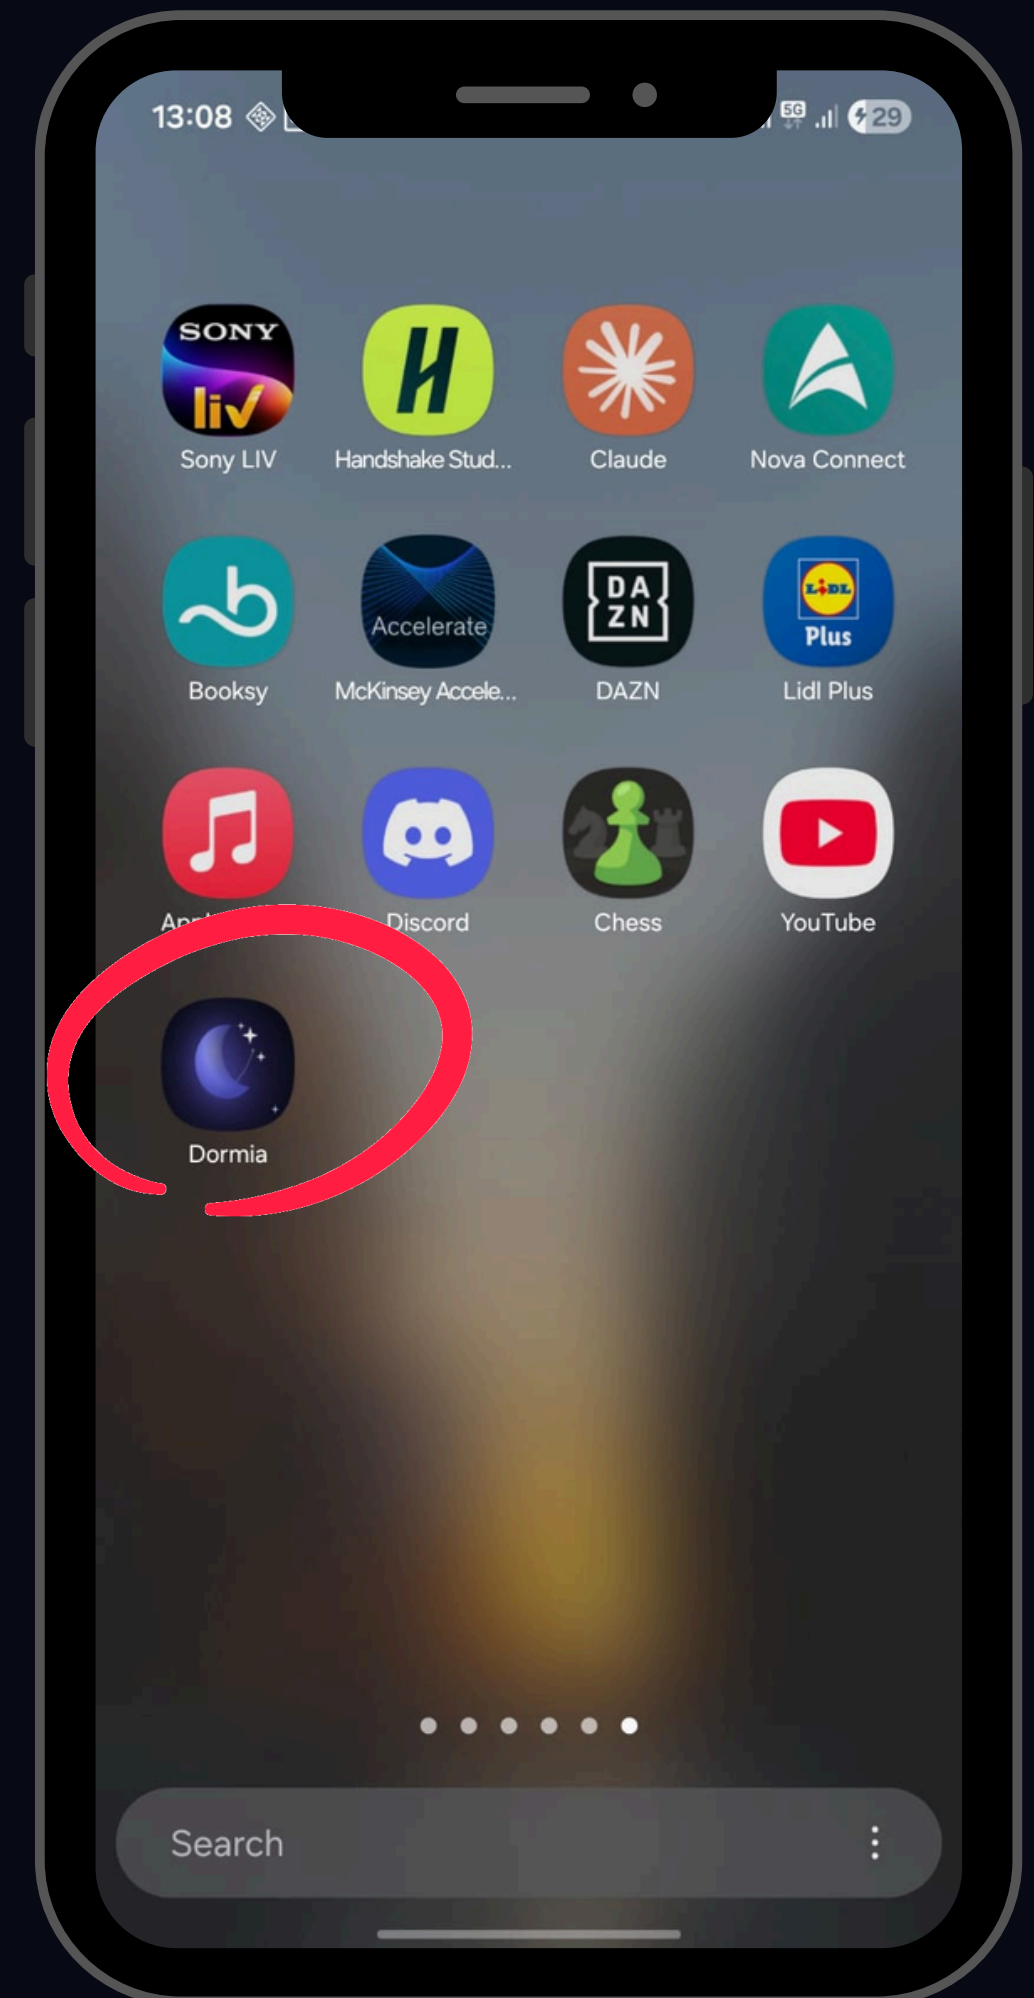

Social media. Games. Streaming. Messaging.
Every product on your phone is optimised to steal your sleep.
Not by accident. *By design.*

1 in 3

adults are chronically
sleep deprived

\$411B

lost annually in the US
from sleep deprivation

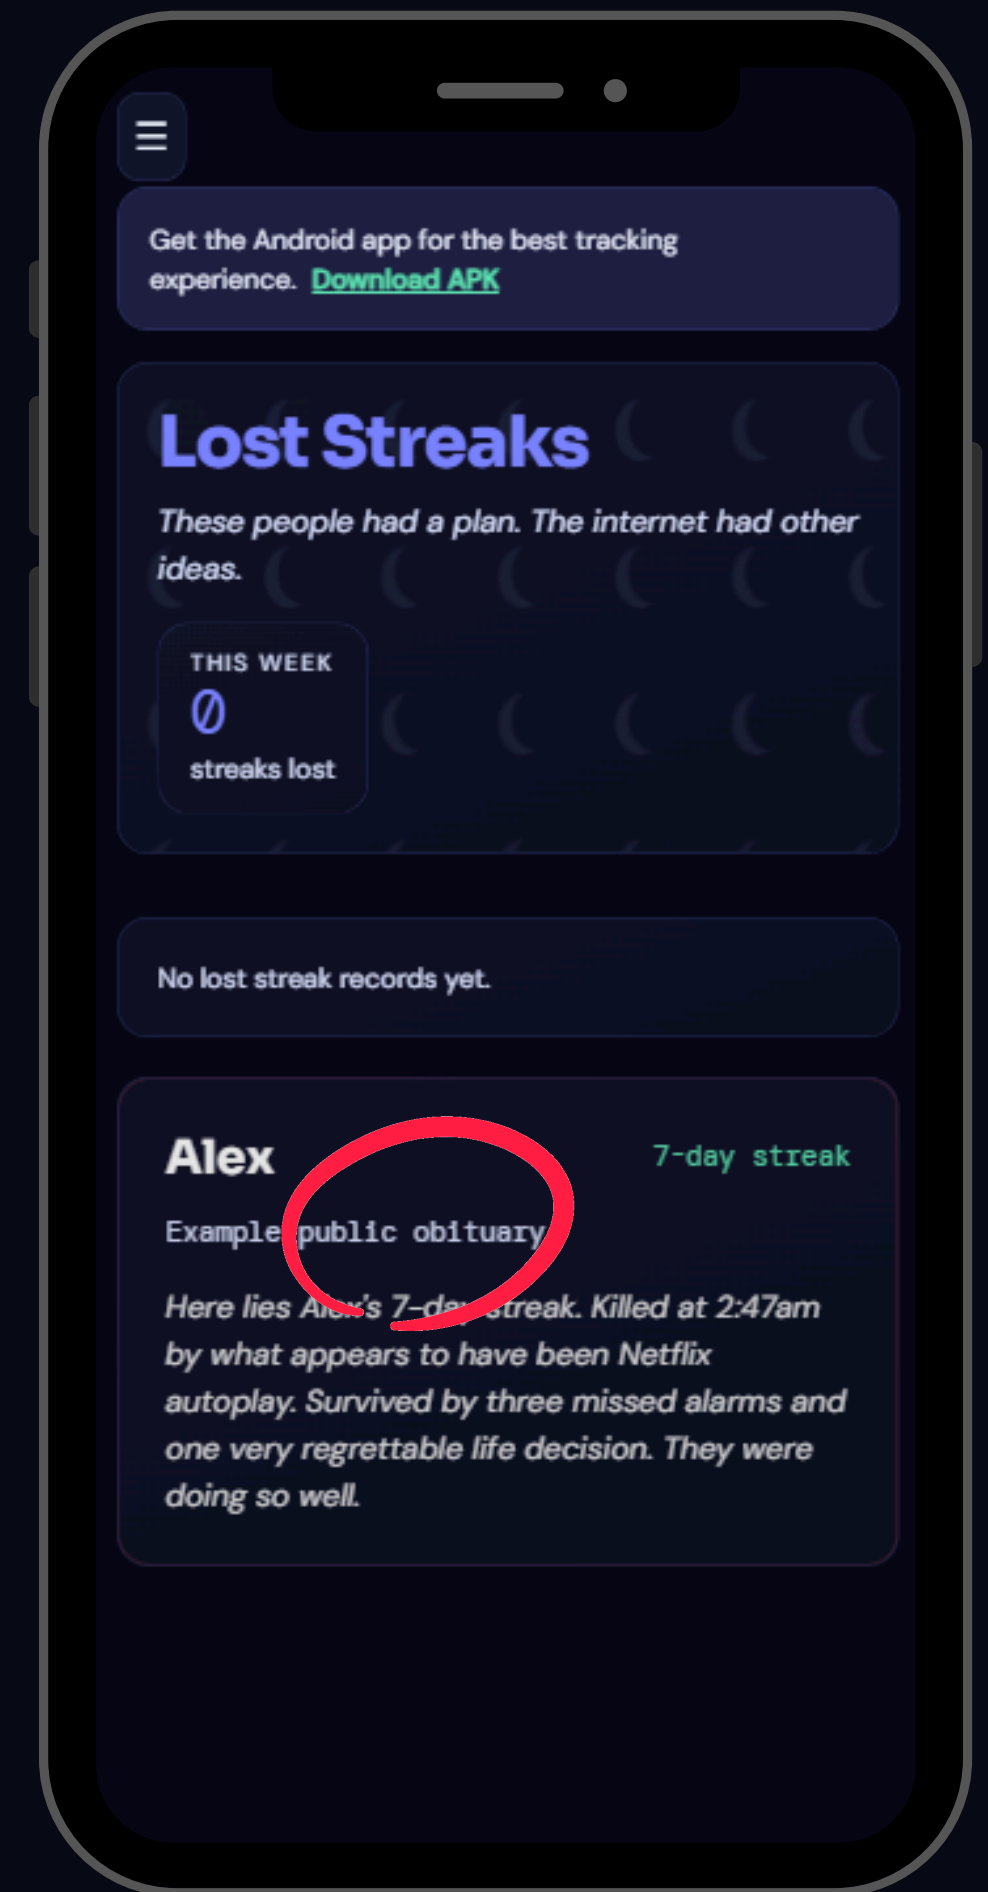

The Twist

We didn't build a sleep tracker.

We built a sport with real stakes. Set your target.
Hit it and climb the leaderboard.
Miss it and Gemini writes your public obituary.

- Hit your target → earn XP, grow your streak, climb the league
- Miss your target → lose your streak, get roasted publicly by Gemini
- 🏆 Best sleeper → takes the pool, owns the leaderboard

Finally, a sport where the winner is who went to bed on time.

The App Interface

DORMIA

Sleep is Now a Sport.

The League

Sleep is more fun when others are losing.

Create a private league, share a code, and compete against people you actually know.

Weekly pool goes to the best sleepers. Bad sleepers
fund the winners. **Every Sunday.**

Built entirely on Google.

GOOGLE SLEEP API

Sleep detection

Passive on-device verification. No wearable. No cheating.

GOOGLE MAPS API

Live world map

Real-time player status across cities, countries, continents.

GEMINI API

Sleep obituaries

Personalised public roasts when your streak dies. Generated live.

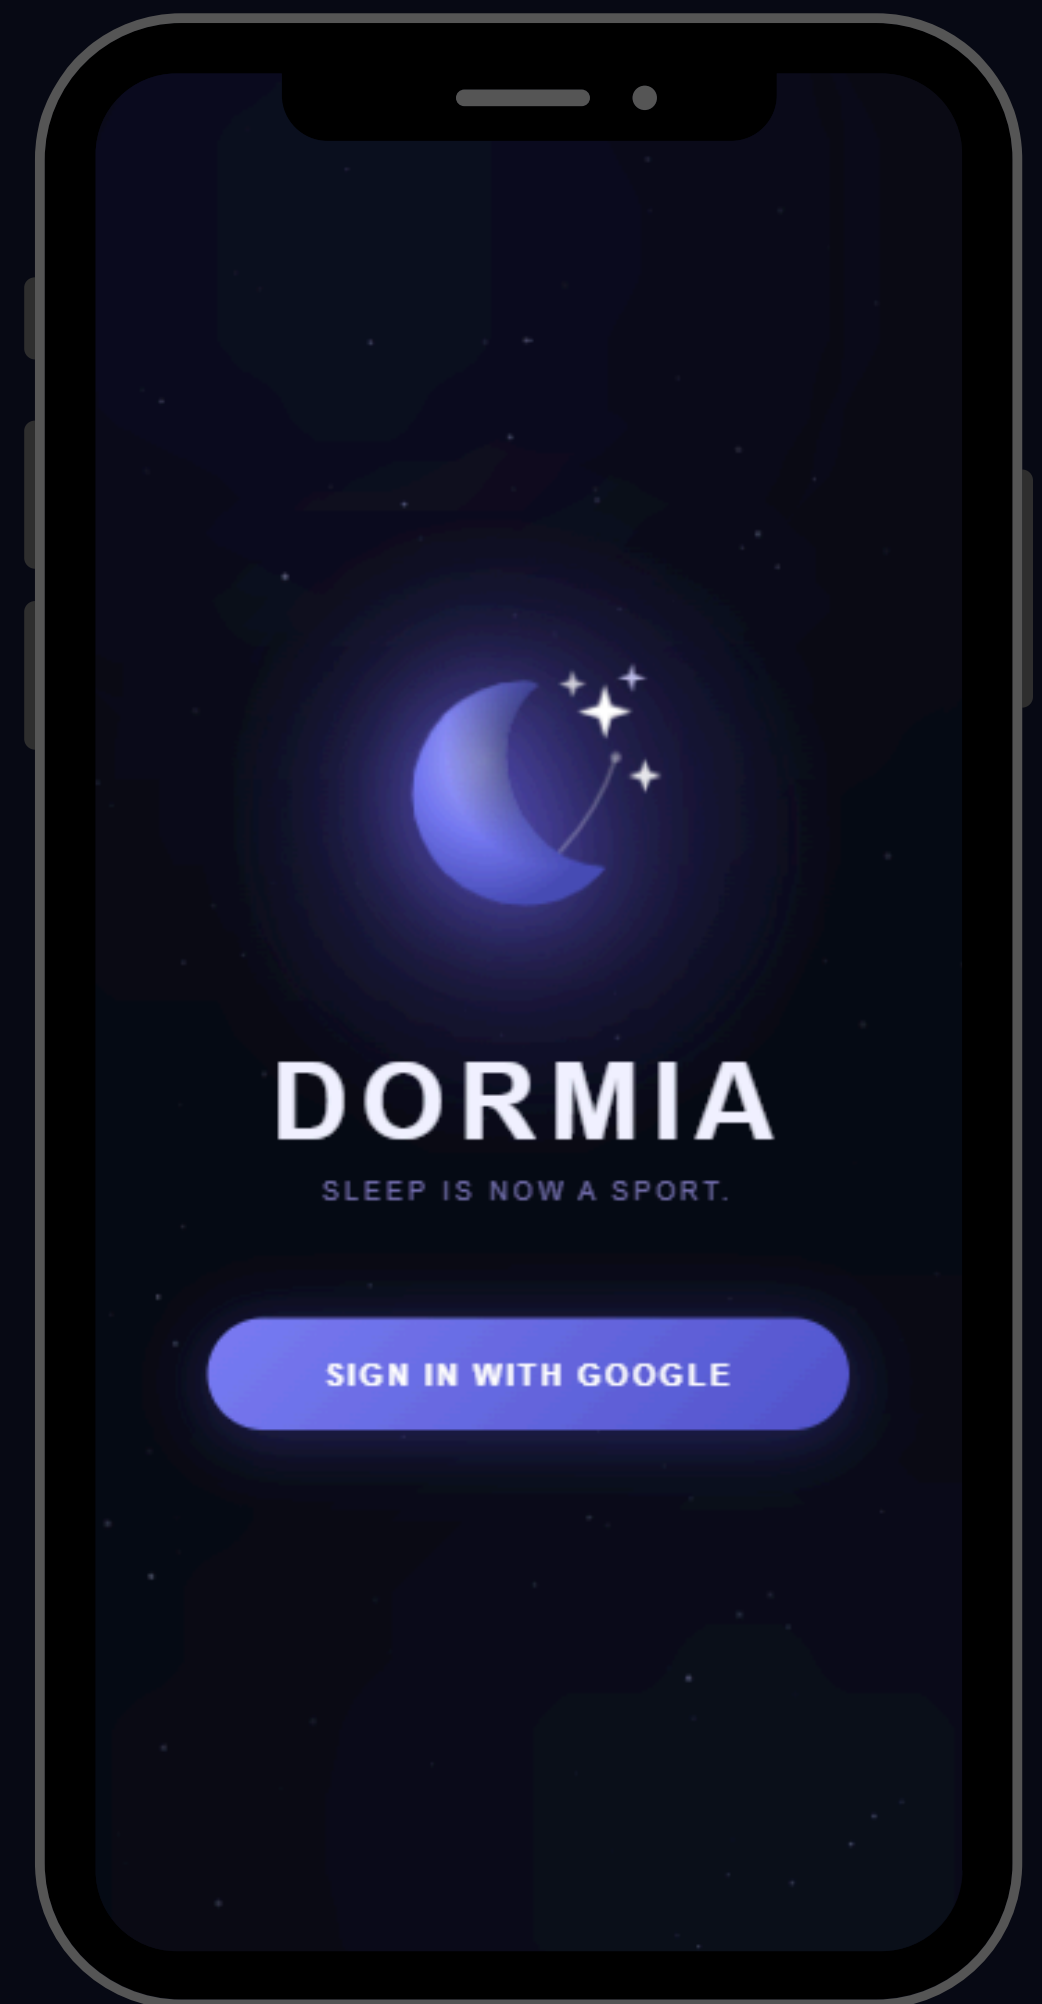

FIREBASE

Real-time sync

Firestore + Realtime DB. Leaderboard and map update instantly.

Till now you got rewards
only for **staying up**.
We built something
that **changes this**.
